00:04:41 3) "Inside Japan" (N) Newsreels:
-00:09:01 <"This is a report on the condition of the people of Japan as the Telenews -
third year of the American era begins. The first characteristic Japan -3-
of Japan in 1947 is hunger, with the main energies of the [sound]
population devoted to the constant search for food. The fish supply
means the difference between life and death for many a Japanese
family and every seaside inlet is lined with people trying to obtain
food from the sea whether it be minnows or seaweed. Seaweed has
become a food staple for the meager fish supply usually reaches
the cities only through black market channels. Hunger has always been
present in Japan, but today starvation has given the cities the appearance
of famine days in India. Under allied guidance a gradual rebirth is taken
place. Out of the despair of defeat and economic disaster a new Japan is
starting to appear. Along with the physical rehabilitation of Japan an attempt
is being made to rebuild the minds of the people so that they can understand the
democratic processes so foreign to their past. Someday these people will
have to be trusted with their own fate. We have set 73 million people on the
march. Will they adhere to democratic principals?">
